

ABOUT US

Uygar Makina was established in 1994 in Denizli, Turkey. Our company manufactures a comprehensive range of cable production machines . We are a well known manufacturer company in Turkey, with strong process capabilities and extensive experience on all kinds of cable machines and dies - i.e. complete extrusion lines, extrusion dies. Besides, we also offer turn-key projects for our customers. Uygar Makina provides the production which is certified by Technical Inspectorate according to the Technical Conditions of international standards products and safety standards.

Recently, we have developed some new crossheads – UMK80-1S (a crosshead especially designed for producing flat cables and cords) and the HRD6 (a crosshead for rapid color changing) – and made some improvements on our extrusion lines.
